

# OMOLOLA PEACE MAKINDE

## POWER BI DATA ANALYST

### EXPERIENCE

#### POWER BI DEVELOPER

- Analyzed large datasets using SQL and Power BI to uncover trends, patterns, and insights, directly influencing business strategy and operations.
- Created and maintained interactive Power BI dashboards and reports to visualize and monitor key performance indicators (KPIs), leading to improved operational efficiency by 25%.
- Automated data extraction and reporting processes using Power Query, reducing manual data processing time by 40%.
- Developed predictive data models to transform raw data into useful information for visualizations using Power BI, forecasting sales trends and identifying high-value customer segments.
- Worked closely with IT and data engineering teams to ensure data accuracy and integrity, consistency, and availability for reporting purposes.
- Managed the deployment and administration of Power BI reports in the Power BI Service, including workspace management, data refresh scheduling, and access control.
- Collaborated with stakeholders to gather requirements and translate business needs into actionable Power BI solutions as well as communicate insights to improve corporate decision-making, resulting in a 15% increase in user adoption
- Optimize solutions for performance, scalability, and data accuracy

#### DATA ANALYST

- Designed and developed interactive Power BI dashboards using advanced DAX to deliver executive reporting, monitor financial and operational KPIs, and provide a centralized, scalable reporting platform.
- Built advanced DAX measures including YoY, MoM, QoQ, YTD, rolling trends, growth rates, and variance analysis to evaluate business performance and support strategic decision-making.
- Analyzed multiple large and complex datasets using SQL and Power BI, uncovering trends, identifying performance gaps, and delivering actionable insights to business stakeholders.
- Designed scalable data models and consolidated data from multiple sources into a unified reporting layer, reducing manual reporting and establishing a single source of truth.
- Developed and standardized business KPIs and performance metrics, ensuring consistent reporting across executive dashboards and business reviews.
- Designed and automated ETL workflows using SQL and Power Query, improving data quality, streamlining data integration, and significantly reducing manual effort.
- Optimized Power BI dashboards and DAX calculations to improve refresh performance, scalability, and long-term maintainability for large datasets.
- Conducted financial trend analysis and variance reporting using historical data to support forecasting, business planning, and performance diagnostics.
- Collaborated with cross-functional stakeholders to gather reporting requirements, translate business needs into analytical solutions, and present insights through interactive dashboards.
- Built predictive analytics models using historical data to support data-driven decision-making and identify future business opportunities.

### ABOUT ME

Microsoft Certified Power BI Data Analyst Associate with experience in developing and maintaining interactive Power BI dashboards, designing, creating, and managing SQL databases, writing advanced SQL queries for data extraction, transformation, and analysis, and building ETL processes to integrate data from multiple sources. Skilled in data cleaning, transformation, and modeling using Power Query to ensure high-quality, reliable datasets that support data-driven business decisions. Experienced in developing stored procedures, views, functions, and optimizing database performance, as well as deploying and administering Power BI reports in the Power BI Service, including workspace management, scheduled data refreshes, security, and access control to deliver scalable, enterprise-grade business intelligence solutions

#### POWER BI DEVELOPER, COLABERRY INC

JULY 2025 – PRESENT

#### DATA ANALYST, JOISEN INSTITUTE AND ANALYTICS

AUG 2022 – JUNE 2025

#### DATABASE ADMINISTRATOR, RCCG

JAN 2020 – JULY 2022

#### CLOUD SUPPORT SPECIALIST, RCCG

JAN 2006 – DEC 2019

#### MANAGER, NESTLE NIGERIA PLC

JULY 2005 -DEC 2006

### EDUCATION

UNIVERSITY OF SOUTH AFRICA, PRETORIA, SOUTH AFRICA 2014

Bachelor of Art

### CERTIFICATIONS

MICROSOFT CERTIFIED: POWER BI DATA ANALYST ASSOCIATE

- MICROSOFT CERTIFIED: AZURE DATABASE FUNDAMENTALS
  - COLABERRY CERTIFIED: DATA ANALYTICS
- CERTIFICATE: SQL, TABLEAU, R, EXCEL, PYTHON

## **DATABASE ADMINISTRATOR**

- Managed and optimized SQL Server databases, ensuring high availability, data integrity, security, and optimal query performance, resulting in a 20% improvement in database processing efficiency.
- Developed and maintained SQL queries, views, stored procedures, and database objects to support reporting, analytics, and operational data requirements.
- Integrated and consolidated data from multiple source systems into centralized databases, supporting ETL processes and enabling consistent, reliable reporting.
- Performed data extraction, transformation, validation, and cleansing to improve data quality and ensure accurate reporting across multiple business functions.
- Monitored database performance, optimized indexes and queries, and implemented performance tuning techniques to improve system efficiency and data accessibility.
- Supported ETL workflows by validating source data, mapping business rules, resolving data inconsistencies, and ensuring successful data loads into reporting environments.
- Implemented data governance, access controls, and security policies, ensuring compliance with organizational standards and safeguarding sensitive business data.

## **CLOUD SUPPORT SPECIALIST**

- Developed and maintained databases and data systems by creating cloud storage accounts for organization's database
- Extracted data from primary and secondary sources with the help of automated tools
- Assessing the quality and meaning of data through analysis
- Interpreting data and analyzing results using statistical techniques
- Troubleshooting: Resolving technical issues and providing customer support
- Monitoring: Monitoring cloud systems for performance issues, threats, and outages
- Security: Implementing and managing security measures to protect data and applications
- Deployment: Developing technical plans for new deployments and supporting them by responding to client questions
- Configuration: Assisting customers with the configuration and setup of cloud services and tools
- Incident investigation: Investigating the causes of incidents and seeking resolution
- Documentation: Creating detailed incident reports and documenting troubleshooting steps
- Collaboration: Working with engineering, security, and other IS teams.

## **SKILLS**

### ➤ **Business Intelligence & Analytics:**

Power BI (DAX, Power Query, Data Modeling, Dashboard Development), KPI Reporting, Data Visualization

### ➤ **Data Engineering & Architecture:**

SQL (T-SQL), Data Warehousing, Data Architecture, ETL Development

### ➤ **Microsoft BI Stack:** SSIS (ETL

Pipelines), SSRS (Reporting), SSAS (Tabular Models)

### ➤ **Cloud & Platforms:** Microsoft

Azure (Azure SQL, Data Services)

### **AI & Emerging Technologies:** AI-

Powered Solutions Development, Prompt Engineering, Generative AI (Claude, OpenAI), Python

### ➤ **Additional Skills:** Advanced

Analytics, Performance Optimization, Stakeholder Engagement, Problem Solving

## **KEY PROJECTS**

### ➤ **BigMart Sales Dashboard:**

Developed a comprehensive Power BI dashboard providing sales performance insights and trend analysis

### ➤ **Sales Reporting Dashboard:**

Created SSRS dashboards to track and analyze sales performance

### ➤ **Revolution Mortgage Group**

**(RMG):** Delivered SSIS ETL pipelines and SSRS reporting solutions

### ➤ **LeadForge AI System:** Designed

an AI-driven lead generation system to improve customer acquisition.

### ➤ **LeadInbox:** Built an admissions

management platform to streamline the student application, review, and enrollment process
