

OMOLOLA MAKINDE

DATA ANALYST

EXPERIENCE

DATA ANALYST

- Analyzed large datasets using SQL and Power BI to uncover trends, patterns, and insights, directly influencing business strategy and operations.
- Created and maintained interactive Power BI dashboards and reports to visualize and monitor key performance indicators (KPIs), leading to improved operational efficiency by 25%.
- Automated data extraction and reporting processes using Power Query, reducing manual data processing time by 40%.
- Developed predictive data models to transform raw data into useful information for visualizations using Power BI, forecasting sales trends and identifying high-value customer segments.
- Worked closely with IT and data engineering teams to ensure data accuracy and integrity, consistency, and availability for reporting purposes.
- Imported data from different sources, perform calculations to find patterns and insights, and create visualizations for various reports.
- Managed the deployment and administration of Power BI reports in the Power BI Service, including workspace management, data refresh scheduling, and access control.
- Collaborated with stakeholders to gather requirements and translate business needs into actionable Power BI solutions as well as communicate insights to improve corporate decision-making, resulting in a 15% increase in user adoption
- Optimize solutions for performance, scalability, and data accuracy
- Translating business requirements into technical specifications
- Ensuring data governance and compliance
- Proficiency with Power BI tools and visualization
- Ability to utilize power BI tools and techniques to visualize and translate technical concepts to easy-to-understand formats, such as charts and slicers for non-technical audiences
- Analytical and problem-solving mindset and approach
- Up to date best practices and advancements in development and designs
- Documenting, designing, and modeling solutions and explaining, and discussing the same with the team
- Ability to quickly shape data into reporting and analytics solutions
- Developed end-to-end business intelligence solutions for effective gathering, analyzing, and interpreting information for data-driven decision making.

ABOUT ME

Microsoft Certified: Power BI Data Analyst Associate and Microsoft Certified: Azure Database Fundamentals with a background in data integration, cleaning and transformation with Power Query ensuring quality data for analysis and up-to-date business decision making. Developed and maintained Power BI reports, dashboards and managed the deployment, administration and control in the Power BI Service. She Has a proficient knowledge of Microsoft Azure for cloud storage and protection with a high flexibility in learning and integrating new updates.

DATA ANALYST, JOISEN INSTITUTE

2024 – PRESENT

CLOUD SUPPORT SPECIALIST

2022 - 2024

ADMINISTRATOR

2006 - 2022

MANAGER, NESTLE

2004 – 2006

TOOLS

- Power BI
- SQL
- Azure
- Tableau
- R
- Excel
- Power point
- Microsoft word

CERTIFICATIONS

- MICROSOFT CERTIFIED: POWER BI DATA ANALYST ASSOCIATE
- MICROSOFT CERTIFIED: AZURE DATABASE FUNDAMENTALS
- CERTIFICATE IN SQL
- CERTIFICATE IN R
- CEITIFICATE IN TABLEAU
- CERTIFICATE IN EXCEL

SKILLS

Power BI:

- Expertise in creating Power BI dashboards
- Data Modelling and Report Building
- Data Extraction and Transformation

CLOUD SUPPORT SPECIALIST

- Developed and maintained a databases and data systems by creating cloud storage accounts for organization's database
- Extracted data from primary and secondary sources with the help of automated tools
- Proficiency in Azure services and cloud security
- Experienced with the various features and capabilities of Azure Storage, including Blob storage, Table storage, File storage, and Queue storage
- Using SQL to assess the quality and meaning of data through analysis
- Interpreting data and analyzing results using statistical techniques
- Resolving technical issues and providing customer support
- Performed complex SQL queries and stored procedures
- Monitoring cloud systems for performance issues, threats, and outages
- Implementing and managing security measures to protect data and applications
- Developing technical plans for new deployments and supporting them by responding to client questions
- Assisting customers with the configuration and setup of cloud services and tools
- Investigating the causes of incidents and seeking resolution
- Creating detailed incident reports and documenting troubleshooting steps
- Working with engineering, security, and other IS teams
- Developing database scripts
- Improved database processing time by 20%
- Ensured data consistency and integrity
- Deep knowledge of database management and data modelling
- Queried master product database and related databases as requested from customers and other internal teams, using T-SQ
- Developed T-SQL queries on large, complex datasets used to analyze data, support operations and create report

SKILLS CONTD

- Data analytics proficiency
- Strong problem-solving skills
- Excellent communication and presentation abilities
- Ability to work in cross-functional teams
- Attention to detail and passion for data-driven decision-making
- Strong knowledge of SQL and data modeling techniques
- Critical thinking for effective problem-solving
- Expertise in SQL, and other analytical tools
- Deep knowledge of database management

AZURE:

- Experience utilizing PaaS offerings
- Utilizing Azure SQL services to administer relational and non-relational data.
- Collecting and analyzing Azure resource metrics and logs.
- Ensuring cloud compliance to organization
